Welcome back to another week! Hope everyone had a great weekend.

Today was Day 1 of required instruction. Teachers have prepared amazing products for remote learning—they have certainly risen to the occasion and crafted video lessons so they can stay connected to their students. It is quite obvious that our instructional staff has put much time and effort into preparing these lessons. Overall, things went well today, but we are requesting that you be patient with us as we learn to teach in this new environment. We need to take everything one day at a time—we're all in this together!

As you know, the Governor has put new restrictions in place which began at 5:00 pm today. We will be in touch soon on how these new restrictions might impact our delivery method for school meals.

Day 10 for CN—1732 breakfast and 1732 lunch meals were served today. Did you know that we served a total of 15,212 total meals last week? Wouldn't you agree that our CN, bus drivers and TAs are fantastic!!

Okay—are you ready for the answer to Friday's riddle? (repeat riddle—What did the math book say to the calculator, puzzle and dictionary?) I have too many problems!! How many of you got this one?

Today's riddle. What has lots of eyes but can't see? We'll find out tomorrow!

Fun trivia animal facts. Did you know that Gorillas can catch human colds and other illnesses? Cows can sleep standing up, but they can only dream lying down. Ducks like to surf—they have been observed riding tides and swimming back to ride them again.

Everyone—hope you had a great day. Students—I am very proud of you—hang in there. We're all learning together!
